DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the abstract is headed with the name of the invention above it. The only heading that should appear on the abstract is "Abstract". Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: On Page 5, lines 5 and 6 of the description of 2A and 2B, the word "innercore shell" should read – inner core shell--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to

Art Unit: 3711

whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation means to break, tear, open, etc., and the claim also recites such as a pull cord or pin which is the narrower statement of the range/limitation.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

4. Claim 1 also recites, in line 2, "an outer layer or layers"; in line 9, "a membrane, partition, chambers, or capsule"; and in line 12, "a means to break, tear, open or otherwise affect said membrane. Is the applicant saying that there is more than one outer layer? Is the applicant claiming more than one way to activate the invention? Therefore, claim 1 is render indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Newcomb et al. (USPN 4695055).

Art Unit: 3711

Newcomb et al. discloses an illuminated translucent golf ball for visibility when playing golf in the dark (See Abstract). The ball comprises a hole (6), which is bored through to the other side of the ball, for receiving a light stick (8) (See Figures 1, 2, and 4). The light stick (8) comprises a vial (10) carrying a chemical (12) within another chemical (14) (See Figure 3 and Column 4, lines 12 through 19). When the vial (10) is broken, the chemicals mix illuminating the stick (8) (See Column 4, lines 12 through 19). The light stick (8) is preferred being broken manually (See Column 4, lines 12 through 19). The vial (10) is considered to be a partition element merely because it separates the two chemicals until it is broken. Newcomb et al. also discloses dimple on the outer surface of the golf ball (See Figures 1, 2, 5, 6; Column 5, lines 17 through 68; and Column 6, lines 1 through 21).

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Newcomb et al. (USPN 4878674).

See the above rejection being that Newcomb et al. (USPNN 4695055) discloses the same subject matter as Newcomb et al. (USPN 4878674).
